SUMMARY

Software Engineer with 2 years of professional experience developing web applications and software solutions using JavaScript, React.js, Node.js, SQL, and Java. Experienced in building customer-focused applications, designing backend services, solving production issues, and delivering scalable software. Strong foundation in data structures, algorithms, and software engineering principles.

EXPERIENCE

Software Engineer (Indian Institute of Millets and Research)

2024 – Present | Hyderabad

- Developed and maintaining production web applications using React.js, JavaScript, and Node.js for internal business operations.
 - Designed REST APIs and integrated SQL databases to support application workflows and business processes.
 - Collaborated with stakeholders to gather requirements, implement features, and improve application usability.
 - Investigated and resolved production issues through debugging and root-cause analysis, improving application reliability.
 - Participated in application deployment, testing, and maintenance across production environments.
-

PROJECTS

1) BKS Agri Mall Billing Software

- Developed an offline-first desktop billing and inventory management application using React.js, Electron, Node.js, and SQLite.
- Implemented billing, invoicing, inventory management, supplier management, stock tracking, and reporting modules..
- Designed local database storage with automated backup and synchronization to improve data reliability..
- Built reusable UI components and optimized application performance for day-to-day retail operations.

2) IIMR Canteen Management System

- Built a full-stack canteen management system using React.js, Node.js, and SQL.
 - Developed REST APIs for order management, billing, inventory tracking, and reporting..
 - Designed relational database schemas for efficient transaction processing.
 - Created administrative dashboards for managing users, orders, and operational reports.
-

SKILLS

Languages: Java, JavaScript, C++, Python.

Frameworks & Technologies: React.js, Node.js, SQL.

Tools: Git, GitHub, VS Code.

Core Concepts: Data Structures & Algorithms, OOPs, REST API, Database Design, Debugging

EDUCATION

B.E. Computer Science & Engineering – Malla Reddy Institute of Engineering & Technology

2019 – 2023 Hyderabad

Intermediate – Tejas Junior College (Hanamkonda, Warangal)

2017-2019 Warangal

School – Sahasra Concept School (Chinnapendyal)

2016-2017 Warangal

Achievements

- Solved 200+ Data Structures and Algorithms problems on Leetcode using C++ and Python.
- Strong understanding of Arrays, Hash Tables, Trees, Graphs, Dynamic Programming, and Searching techniques.
